

Q. find missing number

- first declare a variable then initialize it with 55
 $sum = 55;$
- run a loop and take the value and store it in a variable $arrsum$
- then subtract $sum - arrsum;$

```
{
int sum = 55;
int arrsum = 0;
for (int i = 0; i < arr.length; i++)
{
    arrsum += arr[i];
}
Print (sum - arrsum);
}
```
